

Doing a coronavirus test:

¹ With rapid antigen tests, confirmation with a PCR test is not necessary, but possible.

² You can continue to orient yourself to the recommendations on the [Protect yourself and others](#) site.

³ On the [Protect yourself and others](#) site under “What can you do if you are at especially high risk or want to take extra precautions?” you can also find out who is deemed to be in vulnerable groups.

For more information on tests, scan the QR code:

For more information on the vaccination, scan the QR code:
